

GuideM Academy Beta Sign-up Instructions

Instructor-Led training + Self-Paced = GuideM Academy

This combines interactive, real-time sessions with experienced instructors, fostering collaboration and engagement among students. In addition, learners have the flexibility to progress at their own pace through self-paced modules, allowing them to review content, complete assignments, and achieve personalized learning outcomes.

Congratulations and we are excited to share that the exclusive beta access at GuideM Academy offers students a unique opportunity to experience and influence the development of our platform.

Step 1: Create your Account

Students will be required to create an account associated with the registered email from the enrollment form.

1. Open your browser and navigate to https://academy.guidem.ph/users/sign_up
2. Fill up the following details to create your account.

Create a new account

First Name

Last Name

Current Role

[Sign up](#)

- You can also sign up with Google or your Gmail account by clicking on the Google icon or following this link [google account sign up](#)

You will see a similar window and the system will automatically enroll you in the courses.

The screenshot shows the GUIDE-M website's products section. At the top, there is a navigation bar with links for Courses, Testimonials, My Dashboard, and a user profile icon labeled 'TEST U'. Below the navigation is a search bar with a magnifying glass icon. The main content area features two course cards. The first card, titled 'CDTH' (Cyberdefense & Threat Hunting), features a knight in blue armor holding a sword and shield. The second card, titled 'EH:VAPT' (Ethical Hacking : Vulnerability Assessment & Penetration Testing), features a knight in red armor holding a sword and shield. Both cards include course descriptions and a 'Course' button.

Step 2: Confirm Registration

1. Go to discord on your created ticket using the button "Ask for Help" on your class channel

The button should look like the one below:

Message "Registration to academy confirmed"

- **If you did not provide your registered email please also provide it in the message.**
- **If you have no ticket please open one and follow the onboarding steps.**
- **If you have a ticket use that and do not open a new one**

Lab Exercise 0.1 : Importing your VM & Updating EHVAPT Course

MODULE 1

Lab Preparation EH:VAPT

In this lab, we will guide you through the process of importing customized virtual machine (VM) and accessing Kali Linux

Lab Introduction

The primary objective of this lab is to familiarize you with the steps required to import a virtual machine and access our Kali Linux that has been made custom for this class. Enabling you to set up a safe and controlled environment for practice.

Machine Prerequisites

A Windows or Linux-based operating system. For MAC we only support Intel Based Processors.

- Processor: Core i5/Ryzen 5 or greater - 4 cores 8 threads
- Memory: 8GB RAM (recommended)
- Storage: 120GB free storage or more
- Virtualization support: Intel VT-x/AMD-V

Critical : Incompatibility of M1/M2 Chip for the training

The custom virtual machines and materials for this course do not support M1/M2 ARM based processors.

Software Prerequisites

- Virtualization Software - Vmware Workstation Player/Pro
- Note Taking tool

COMPLETE & CONTINUE →

To ensure that everyone progresses together and no one gets left behind during the training, the materials is set to unlock the course module on the day of the training.
