

GuideM Academy Beta Sign-up Instructions

Instructor-Led training + Self-Paced = GuideM Academy

This combines interactive, real-time sessions with experienced instructors, fostering collaboration and engagement among students. In addition, learners have the flexibility to progress at their own pace through self-paced modules, allowing them to review content, complete assignments, and achieve personalized learning outcomes.

Congratulations and we are excited to share that the exclusive beta access at GuideM Academy offers students a unique opportunity to experience and influence the development of our platform.

Step 1: Create your Account

Students will be required to create an account associated with the registered email from the enrollment form.

1. Open your browser and navigate to https://academy.guidem.ph/users/sign_up
2. Fill up the following details to create your account.

Create a new account

Registration to academy confirmed.

Within 48-72 hours the system will enroll you on the course if you did not receive an email please message on the discord ticket above.

Step 3: Receiving Enrollment Confirmation

Once the system enrolls you to the course you will receive an email from noreply@notify.thinkific.com or training@guidem.ph notifying that you are now enrolled.

The screenshot shows an email inbox with a single message highlighted. The subject line reads "You are now enrolled in Ethical Hacking : Vulnerability Assessment & Penetration Testing!" with a yellow arrow pointing to the "Inbox" button. The message is from "GuideM <noreply@notify.thinkific.com>" and was sent "4:28AM (2 minutes ago)". The email body contains a blurred header and a thank you message: "Thank you for enrolling in Ethical Hacking : Vulnerability Assessment & Penetration Testing." At the bottom, there are links for "Login to your account" and "Edit notification settings". The footer of the email is powered by Thinkific, stating "Everything you need to create & deliver courses on your own site".

Step 4: Access the course materials

Once the system enrolls you to the course please go to the MY DASHBOARD

The screenshot shows the top navigation bar of the Guidem website. It includes the Guidem logo, a search bar, and navigation links for "COURSES", "TESTIMONIALS", "MY DASHBOARD", and "TEST U". A red arrow points to the "MY DASHBOARD" link, which is highlighted with a red border. On the far right, there is a user profile icon and a notification bell icon.

Lab Preparation EH:VAPT

In this lab, we will guide you through the process of importing customized virtual machine (VM) and accessing Kali Linux

Lab Introduction

The primary objective of this lab is to familiarize you with the steps required to import a virtual machine and access our Kali Linux that has been made custom for this class. Enabling you to set up a safe and controlled environment for practice.

Machine Prerequisites

A Windows or Linux-based operating system. For MAC we only support Intel Based Processors.

- Processor: Core i5/Ryzen 5 or greater - 4 cores 8 threads
- Memory: 8GB RAM (recommended)
- Storage: 120GB free storage or more
- Virtualization support: Intel VT-x/AMD-V

Critical : Incompatibility of M1/M2 Chip for the training
The custom virtual machines and materials for this course do not support M1/M2 ARM based processors.

Software Prerequisites

- Virtualization Software - Vmware Workstation Player/Pro
- Nmap Tool

COMPLETE & CONTINUE →

To ensure that everyone progresses together and no one gets left behind during the training, the materials is set to unlock the course module on the day of the training.

Hi [REDACTED] your journey starts here
has not yet been released.

This content will be available to you on Saturday,
August 12, 2023 8:00 AM.

OK, GOT IT

This will help us stay on the same track and maintain a consistent pace throughout the program. Doing so, we believe it will enhance your learning experience and allow for better interaction and

collaboration among all participants.

Frequently Asked Questions:

FAQ : What is the benefit of GuideM Academy?

We have been working hard to enhance all materials and we would want everyone to have access to updates as soon as they are published. As part of our ongoing efforts to improve our learning platform, we are introducing a new feature called GuideM Academy students. The GuideM Academy will have additional functions such as.

- **Rolling Updates**: At GuideM Academy, we believe in continuous improvement, and that applies to our course content as well. As we receive feedback from students like you and stay up-to-date with industry trends, we will be making rolling updates to the course. \
- **Extra Bonus Materials**: Alongside the core course content, we are thrilled to provide you with a collection of bonus materials. These bonus materials are designed to expand your knowledge, challenge your thinking, and encourage critical exploration of the course topics.
- **Projects and Assignments** - These are tasks covered in the course but much more like a guided task wherein research will be required.
- **Quizzes** - We will provide quizzes that will further aid student's retention to the training.
- **Lab Exercise Hints, Spoilers and other tooltips** - At GuideM Academy, we understand that learning is a process of discovery and growth. That's why we've included hints throughout the course content to gently nudge you in the right direction when facing challenging concepts or problems.
- **GuideM Tips** - We're pleased to announce that GuideM Tips will be further expanded and enriched on GuideM Academy.

During this phase, GuideM Academy will be in beta, which means you get the exclusive opportunity to access lifetime updates to the course content. This means that even after the training is complete, you will continue to have access to the course materials, updates, and resources for as long as GuideM Academy is operational.

FAQ: Are all the features updated to the academy and are there videos?

As of now, some of the course content has not been migrated to the academy platform yet. We are actively working on it and plan to have all the relevant content available to you as soon as possible.

The videos & other materials are still in development and we plan to add more content that we cannot cover on live trainings due to time constraints such as more topics in web application, exploit development and scripting lessons.

FAQ: When will all the materials be available on the academy?

We are working diligently to ensure that all course materials are migrated to GuideM Academy as soon as possible. Our current target launch date for the complete availability of all materials is on **November 11**. Starting from enrollment to this date, Academy materials will be updated.

FAQ: Will the live class recording available on academy?

Some parts of the live training will indeed be available on GuideM Academy on November 11. However, to enhance your learning experience, we are also creating separate videos exclusively for

the academy that has enriched quality.
